EDUCATION

Gokaraju Rangaraju institute of Engineering and Technology **Cumulative GPA - 7.3**
Bachelor of Technology in Electrical and Electronics Engineering(2022-2026)

Master Minds Junior College **Class XII with 85%**
Intermediate in MPC(2020-2022)

SKILLS

- **Programming Languages:** Python, SQL, C.
- **Data Engineering:** Databricks, Data cleaning, Data Validation, Reporting & Stakeholder Management.
- **Microsoft Fabric:** PySpark, Data Factory, Onelake, Medallion Architecture and ETL/ELT.
- **BI & Visualization:** Microsoft365, Excel, Power BI, DAX, Data Modeling, KPIs, Dashboarding.
- **Proficiencies:** Analytical Problem-Solving, OOPS, Git, Github, Team Mentoring.

WORK EXPERIENCE AND ACTIVITIES

Founding Developer, **Execron** *(Early stage Tech Startup based in hyderabad)* **Mar 2026 - Sep 2026**
  - Cobuilt Devflow scaling it to 250+ users while shipping AI-infused products that address practical industry gaps.
- **Business Development Executive**, Aimss Academy (Built Website,Sales Acceleration,SEO) **Oct 2023 - May 2024**
- **Youth Lead**, Sphoorthi Foundation (Empower orphaned children through mentorship, fundraising, and development.)
- **Curation Lead**, TEDx GRIET (Fostering a Culture of Idea Sharing)

PROJECTS

Formula 1 Data Engineering & RAG Agent | Databricks | AzureAI **Sep 2026 - Oct 2026**
(github.com/sandeepmegharaj/F1-Analysis-and-RAG-Agent.git)

Live Demo: APEX Agent
- Built a data platform using 2024 Formula 1 data, organized into Bronze, Silver, and Gold layers.
- Used PySpark and Delta Lake to transform raw data into curated tables for analysis.
- **RAG agent:** Searches Formula 1 knowledge documents for relevant passages, then uses an LLM to answer the user's question based on the retrieved information.
- **Tech:** Databricks, PySpark, Delta Lake, DuckDB, LangChain, RAG, Azure AI, Chroma, SQL, tool calling.

Sterling Oil & Gas – End-to-End ETL Data Pipeline & Analytics | Microsoft Fabric **Aug 2026 - Sep 2026**
(github.com/sandeepmegharaj/Sterling-Financial-Analytics-Power-BI-Fabric.git)

Live Demo: Analysis & Report
- Built an end-to-end Microsoft Fabric ETL pipeline for ingestion, cleaning, transformation and analytics.
- Implemented Medallion Architecture (Bronze–Silver–Gold) and pipeline orchestration.
- Processed Realtime 3,744 production/downtime records and 288 cost/value records.
- Developed two tool-using AI agents with RAG(AI Search) for production analysis and cost/value analysis.
- **Tech:** Microsoft Fabric, PySpark, SQL, Lakehouse, Power BI, Azure AI, Azure Foundry.

ACHIEVEMENTS AND CERTIFICATIONS

- **Certified Microsoft Fabric Developer**, **Agentic AI**, **GenAI** Full Fledged (Udemy),
- **Finalist** (Top 5) at HACKATHON 1.0 International level hackathon, SPEC HYD (Dec 2025)
- **Participated** at Gen AI Exchange Hackathon, Google Cloud (Oct 2025).
